

App review using iPad (18/8/2021)			
Issue	Fixed	Current Issue	Fixed by Sophie
1. I need the ability to change a password in the dashboard after a student account has been generated, Currently, once an account has been generated, there is no way to change the password in the account. (see db1.pdf)	✓	No issues. All good.	✓
2. Admins should have access to ALL courses without having to assign them to themselves in the dashboard.	✓	No issues. All good.	✓
3. If the same email is accidentally used when creating a new user in the dashboard the screen displays a SQLSTATE[23000]: Integrity constraint violation: Can this be changed so that it displays a message that says "Email address already in use. (see db2.pdf)	✓	No issues. All good.	✓
4. Students should have access to ONLY the courses that have been assigned to them in the dashboard by Admins	✓	None. All good.	✓
5. If students have no courses assigned to them the app should open up to a blank menu. Currently, the landing page hangs and there is no way of closing the app except to delete it. (see video: https://youtu.be/NR1IpE2fosw).		If students have no courses assigned to them the app should still open up to the 'View List' page.	
6. The Hot Spot quiz allows the student to put a hot spot on every part of the photo and automatically get the question right. The should only be allowed to put one hot spot on the photo and the hot spot must be the correct spot of the photo. Please see screenshot #1 below		This needs to be fixed so that it reflects the correct answer.	
7. It don't know if it sent results to assess@assessnow.com.au		I cannot access assess@assessnow.com.au without it sending a code to your phone (not mine) I need to access our email directly so that I can check the results directly. Please fix this now.	
8. It also did not send results to the user's email address It sends them ALL to spam		This needs to be fixed.	
9. I've changed the icon test quiz but the iPad still shows the old version from before I changed the icon of the test quiz.	✓	None. All good.	✓
10. When I go in to airplane mode the quiz won't load. Then, When I go out of airplane mode the quiz still won't load. I have to delete the app and then download the app again before I can see the updated version.	✓	None. All good.	✓

	Intermittent		
<p>Sometimes, when I complete the quiz it gets stuck on 'Sending assessment results'. I have checked and it does not send assessment results back to the web dashboard. Please see screenshot #2 below. Even though it has not sent the results back to our admin staff it says 'Pass' (Please see screenshot #3 below). This should say 'Pending' until we receive the assessment results at our email inboxes.</p>		Additional problem found	
	Offline		
<p>After doing a quiz offline and then going online it does not send the offline assessment results to the admins and students until the user opens up the app and logs back on with their username and password. Students will forget to do this. Can we make it happen (automatically send the results) as soon as the app is opened up again without the need for the student to sign in again?</p>		Additional problem found

• Pass ✓

It says 'Pass' on the student app even though it has not saved and sent the assessment results to the web app dashboard or to the student's email or to assess@assessnow.com.au. We need to receive the assessment results before it says 'Pass'. This should say 'Pending' until we receive the assessment results at our email inboxes.
